

ALL VINYL FENCES ARE NOT CREATED EQUAL!

Dear Prospective Vinyl Fence Buyer,

Please beware of the multiple new vinyl fence products that are hitting the metro-Boston market. Most, if not all, of these products are constructed of **inferior material**. Many come from foreign countries, and their material has not been tested – the quality is a Big Unknown.

DO NOT be fooled by a low price. Ask yourself (or, better yet, ask the potential installer):

1. Can this product stand up to New England weather, especially the winters?*
2. Will this product last 15, 10, or even 5 years, if its construction is inferior? (Reliable's vinyl fences last 20-30 years or more.)
3. And finally, if a fence company is pushing a never-before-tested, inferior product, will the installer be here in a 1 year (or even in a month), in case there's a problem or issue? (Reliable has been serving metro-Boston for **over 50 years.**)

Reliable offers 3 quality, time-tested vinyl products that have been proven to stand up to all that the Boston weather has to offer:

Maximum (Maximumfence.com)
Kroy (kroybp.com)
Enduris (Enduris.com)

Visit
their
websites!

What's more, our installers are the Best and Most Experienced in all of New England.

**So don't be fooled by false promises and inferior quality.
Choose Reliable!!**

*A true story: we recently asked the representative of a foreign vinyl fence manufacturer whether their fence was strong enough to withstand 20+ years of New England winters. His response: one of their fences was erected in Florida six months ago, and it's still standing. Needless to say, Reliable won't offer that product.
